SUREFUSER™+

PORTABLE INFUSION SYSTEM

Surefuser™+ PCA SET

Surefuser™+ Variable Flow Regulator

Surefuser™+ Amber SET

NIPRO

SUREFUSER. THE FREEDOM OF AMBULATORY THERAPY

- Earlier patient discharge resulting from increased mobility and improved pain relief, particularly in the post-op setting.
- Lightweight, single use and silent device - no malfunctioning alarms or repair costs. Flow rate is confirmed via the bold, precise scale markings.
- Sleek, compact design can be worn discreetly under clothing or in patient's pocket. Also available with a Nipro Surefuser carry bag.

THE SIMPLE, SELF-POWERED SOLUTION FOR ALL

- Single use elastometric infusion device with fixed or variable flow rates.
- Efficient particulate, self-venting filter and back-check valve.
- Strong port connector plus integrated, anti-kinking infusion line (DEHP-free).
- Flat, ergonomic Flow Control Unit to ensure accuracy and reliability.

DESIGNED FOR USE IN A WIDE RANGE OF THERAPEUTIC SETTINGS

- Operating Theatre/Recovery - delivery of post-operative pain relief, potentially reducing the need for opioids and increase patient mobility.
- Oncology - delivery of anti-cancer drugs.
- Community & Palliative Care - continuous antibiotics therapy and pain management at home.

SIMPLE FILL, PRIME AND CONNECT

- Fill the Surefuser using a standard syringe (Luer Lock is recommended) connected to the part.
- Open the Robert Clamp to prime the infusion line and attach the patient label included.
- Attach the connector to the patient's line and begin the infusion therapy.

PATIENT CONTROL ANALGESIA (PCA)

PCA is an abbreviation of "patient control analgesia", when a patient feels pain, the device enable the patient to administer certain volume of anesthesia by himself/herself.

- Secure injection by one push
- Priming port with silicone tube check valve
- The bottom of the handle is transparent, enabled user to monitor the solution remained.
